John,

Thanks for your patience with me and your work in making things happen.

I use to have a quote from one of our corporate Management Training session which said something to the effect that any attempt to manage by committee or boards will result in delays which can only be reduced by having a strong chairperson who demands that the required action is achieved on each agenda item to prevent it being listed as "Unfinished Business".

I see you as one who pushes to make that happen. We need more who strive for that goal.

Give Janet my wife and my great appreciation for the super "Tom's Cafe writings". We look forward to them so much.

Jane and Bernie
